

## Spouted Pouch Packaging Machine

# TT-15CW-10 / TT-15CF-10

- High speed duplex spouted pouch filling & capping machine for beverages, purees, baby food, nutritional & dietary supplements, liquid detergents & others.
- Two stage vacuum / fill nozzles insure pouch is completely filled with very low residual air. Optional N2 flush system.
- Torque verifying capping system insures proper capping. Standard and child-safe cap capable.
- Pouches supplied using simple snap in rails. Optional high capacity pouch stockers available for extended autonomous operation.
- Interlock with TX-100SP-1 or TX-15SP-1 Spout Inserter for automated pouch production / filling & capping operation. Significantly reduces packaging, shipping & storage costs.
