

High Speed Pre-made Pouch Filler / Sealer

S-08

- An evolved, flexible platform, capable of running a wide range of product & pouch types at higher output rates and in a smaller footprint.
- (Option) Equipped with auto changeover function, significantly reducing changeover time.
- Modular design provides excellent maintainability and expandability.

Retort/Hotfill

Wet Use

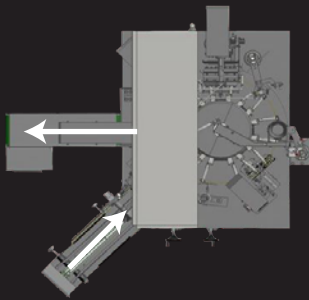

Stations

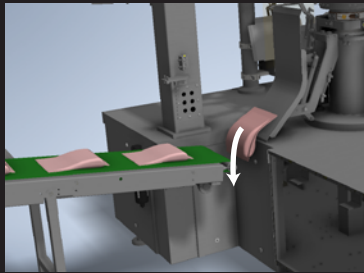

Simplex

Conveyor Angle

Easy to connect to downstream line, allowing for more compact layout.

Defective Product Rejection

Defective products are rejected and discharged outside the packaging machine.

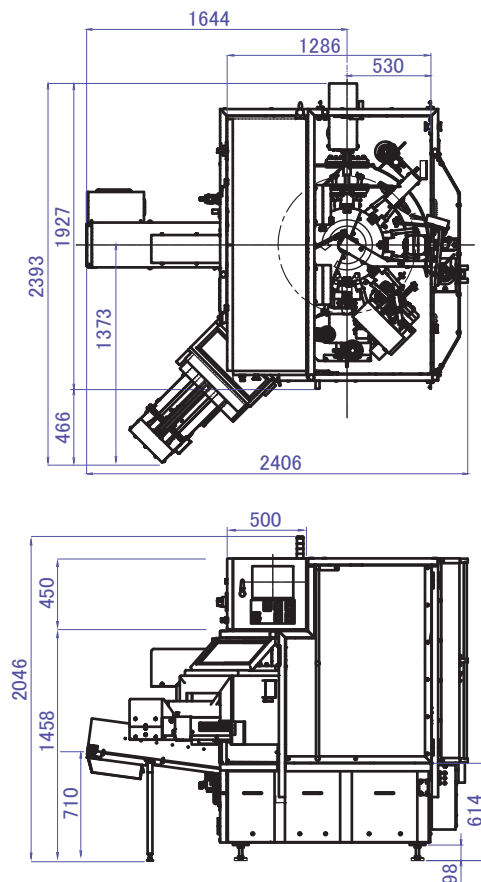

Operation Touch Panel

A three-layer screen structure-Operator, Supervisor, Maintenance - allows efficient operation.

Machine Dimensions

* Specifications & dimensions subject to change without notice.

Machine Specifications

* Depending on product

Capacity	Max 65 ppm
Pouch Size	W:120-260 (80-220) mm L:120-400 mm
Pouch Material	Various pouches
Pouch Style	Flat, Stand-up pouches, Zip pouches
Filling Method	Various pump depending on filling product
Liquid Filling Volume	50 ~ 1000ml
Deaeration	Pressing
Sealing Method	2-stage heat/cool sealing method 3-stage heat/heat/cool sealing method
Electric Power	3.75kVA
Air Consumption	0.5MPa, 450L/min (ANR)
Machine Dimention Weight	W2,393 × L2,406 × H2,046mm 1,780kg
Accessories	Pouch magazine Product counter HMI touch panel Pouch opening detection Heater disconnection alarm Safety cover
Options	Pouch feed position detection , Double pouch pickup detection , Pouch recycling , Printing , Print inspection , Zipper pouch opening , Bottom opening , Feed standby operation , Seal surface cleaning , Product in seal detection , Various filling units , Compressor , Separate servo filler , Automatic product change function , Automatic lubrication function

Applications

DRY Products: Snacks, Beans, Rice crackers, Seasonings, Candies, Nuts, Pasta, Pet food, Powder products, etc.

WET Products: Retort pouch foods, Ready meals, Frozen foods, Cooked rice, Juice, Processed seafood, etc.
